## Objective

Senior Software Engineer with 3.6+ years building scalable, low-latency distributed systems in fintech and banking. Specializing in Java, Python, Spring Boot, and AI/LLM integrations for high-performance backend and intelligent automation solutions.

## Technical Skills

**Languages:** Java, Python, SQL

**Backend & Frameworks:** Spring Boot, FastAPI, REST APIs, JUnit 5, Mockito, AssertJ, Testcontainers, pytest, Microservices, Event-Driven Architecture, Distributed Systems

**AI & ML:** OpenAI API, Azure AI, LangChain, RAG Pipeline, NLP, Machine Learning, Prompt Engineering, LLM Integration, AI Recommendation Systems

**Vector & Search:** Pinecone, pgvector, FAISS, Vector Embeddings, Semantic Search

**Data & Messaging:** PostgreSQL, MySQL, Apache Kafka, AWS SQS, Redis

**DevOps & Cloud:** Docker, Kubernetes, AWS (EC2, S3, SQS), CI/CD, Git

**Core Strengths:** System Design, Scalability, Low-Latency APIs, Payments & Fintech, Observability, Automation

## Experience

**Senior Software Engineer**, ICICI Bank – Mumbai, India

Apr 2026 – present

- Built an AI-powered Customer Email Intelligence System that reads inbound customer emails, classifies intent (account queries, card issues, disputes, complaints) using OpenAI API and Azure AI, auto-generates contextual responses, and dispatches reply emails — reducing agent handling time and improving resolution SLA.
- Developed demand account and card management backend services handling customer lifecycle operations via scalable, low-latency REST APIs.
- Technologies:** Java, Spring Boot, OpenAI API, Azure AI, REST APIs, Microservices, PostgreSQL

**Software Development Engineer**, NIUM – Mumbai, India

Aug 2025 – Mar 2026

- Architected Bulk Transaction API processing 1,000 cross-border transactions/request with sub-3-second SLA via async acknowledgment, job scheduling, and real-time webhooks.
- Optimized Cross-Border Payout System handling 10,000+ daily transactions; improved throughput and reduced Mean Time To Resolve (MTTR) by 5% while maintaining PCI DSS compliance.
- Technologies:** Java, Spring Boot, Python, PostgreSQL, AWS SQS, Redis, Docker, Kubernetes

**Deputy Manager – Backend Engineer (Payments & Fintech)**, Axis Bank – Mumbai, India

Aug 2022 – July 2025

- Built 20+ scalable REST APIs for Outward Remittance Platform integrating Groww, INDmoney, and Vested — drove 30% adoption growth and cut transaction failures by 15%.
- Designed a dormancy automation plugin to identify inactive accounts (15 plus days), generate CSV files, and upload them to STP for downstream data sync — saving ₹50 lakh annually and eliminating manual effort
- Technologies:** Java, Kotlin, Spring Boot, Kafka, MySQL, Redis, Docker, Kubernetes, AWS

## Projects

**AI-Based Natural Language Query System | Python, FastAPI, NLP, pgvector, PostgreSQL**

2026

- Converts plain English questions into SQL queries and returns results in real time — enabling zero-SQL data access for non-technical users via NLP intent extraction and dynamic SQL generation.
- Integrated vector embeddings with pgvector for semantic search and smart result ranking; supports complex filters across large datasets.
- "Show students applying for Canada with fees below 20 lakhs" → parsed, converted to SQL, results returned instantly.

**International Student Admission Platform (AI-Enabled) | Python, FastAPI, ML, Pinecone, Docker**

2026

- End-to-end admissions SaaS for study-abroad consultancies — student lead management, course/college browsing, application workflows, document uploads, and admin dashboard.
- Integrated ML layer with Pinecone vector search for course recommendation, eligibility prediction, lead conversion scoring, and AI-powered guidance chatbot.
- JWT-secured, role-based REST APIs built for scalability using async FastAPI and Docker.

## Education

**Aryabhatta Knowledge University**, in B.Tech, Computer Science and Engineering – Patna, India

Aug 2018 – July 2022

- CGPA: 8.02 / 10

## Certifications

[AWS Certified Cloud Practitioner — AWS](#)

[Build RESTful APIs with Kotlin & Spring Boot — Udemy](#)

[Full Stack Development — E&ICT Academy, IIT Kanpur](#)

[Python — C-DAC ACTS](#)
